Sevilla is bike-friendly

In Seville, we have understood that cities have to be ever more human. In just a few years we have evolved to a model of mobility where the bike is the main protagonist.

[» SEVICI, public bicycles of Seville](#)

Flat Seville

Seville has always been an easy, flat, sunny city ... and this had to be taken advantage of, including for those on two wheels. That's why we built many kilometres of cycle paths throughout Seville, and a public bicycle rental service called Sevici was launched.

The result of all this is now at your disposal. If you come to Seville you will be able to enjoy 180 kilometres of cycle paths and 260 Sevici stations, open 24 hours a day. **This is the life!**

Discover the city on two wheels

The network of lanes reaches all the neighbourhoods of the city, you can move your way from one end to another of Seville, and it even reaches some municipalities of the metropolitan area. All this has made Seville a paradise for bike lovers.

Experience the cycling revolution

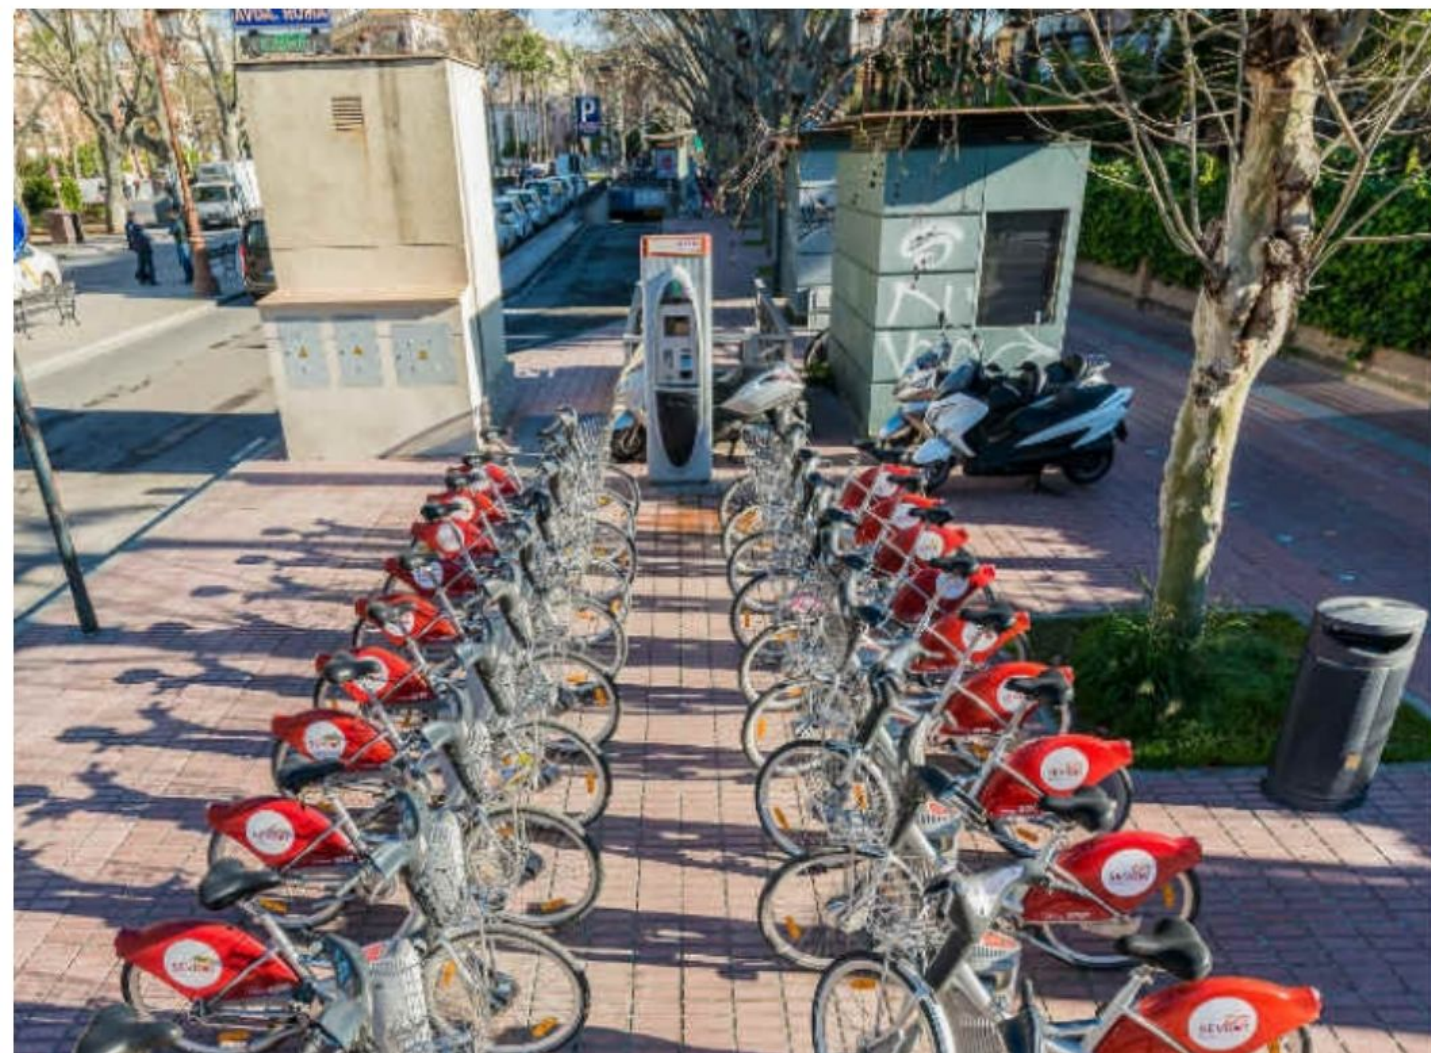

Cycling in Seville is priceless: its pleasant climate, the beauty of its monuments and the expanse of its bike lane, all interconnected, lets you enjoy a unique experience within the reach of very few cities in the world.

-

To this end, four themed itineraries have been created for anyone who wishes to discover emblematic places of the city from another point of view. Dare to try them all!

-

And we are not stopping there! The cycle lane network is expanding, the use of this transport is becoming more widespread every day, and the pace of the city is adapting to that of a modern and sustainable city that is committed to a development on a human scale. Don't miss the Seville of the 21st century.

Seville

Seville moves forward with new facilities for the use of bikes, using the same model as other cycling lover European cities. The first safe bike-station has been settled in the area of San Bernardo-Viapol, at the esplanade where a transport hub (metro, tramway, suburban train, buses) is located.

The users interested in parking their bikes in this secure place, with 212 spots, simply need to use the app "PVerde" or on the website <https://secure.parkingverde.com>.
